

## CLASSROOM SUPPORT STRATEGIES

Lighthouse School Leeds is now offering training and outreach support from our school training suite or in house if required.

**Do you want to know how to support young people with autism more effectively in classroom environment? How do I provide assistance but not hinder independence? What strategies can I use that are Autism friendly?**

Our classroom support strategies workshop will support professionals working with young people with Autism develop the problem solving skills to support more effectively in the classroom and promote positive outcomes for young people.

During the session you will receive:

- Advice on Autism support strategies
- How to be an effective support in the classroom
- Helping to build your understanding of the day to day difficulties experienced by someone with Autism.
- Opportunity to spend some time in a classroom at Lighthouse School and be able to observe experienced specialist staff utilising the strategies and a reflection opportunity.
- Problem solving round table discussions with staff working on the Lighthouse Outreach Team about specific challenges which you face, and think about some strategies to support the child you work with.

The facilitators of the workshop are all members of the lighthouse school team and have experience of working with Autistic individuals in a variety of settings.
