

Would you have kept your child off school before Covid?

YES

Keep your child off school

NO

Do they have:

- 1) A cough – new and continuous, or just generally?
- 2) A fever (high temperature over 38°C using a thermometer) – even once.
- 3) A complete loss or change of smell or taste?
- 4) An illness – even if common – that leads to high temperatures?

YES

Keep your child off school and at home. Contact the school straight away.

Speak to 119 or go to the [www.gov.uk/coronavirus](http://www.gov.uk/coronavirus) website and arrange for a test to be done

Your child and your household must self-isolate until you have the result of the test

NB: If a child can't get a test after the first three days of symptoms, they are likely to test negative whether they have CV-19 or not. As a result, if a test is not administered within three days of symptoms, they must self-isolate for 10 days.

NO

Does your child have an underlying chronic medical condition such as cystic fibrosis?

NO

Do they have...

Diarrhoea  
Vomiting  
A sore throat

A runny nose  
A headache  
Stomach ache  
...without a temperature

YES

Speak to their specialist team about testing criteria if you haven't already seen or spoken to them or had a letter in the post telling you when to worry

Stay at home until the symptoms subside (+48hrs)

Please report any illness before sending your child to school, so we can support your child attending school as soon as possible
